

STEEP SLOPE ROOFING

DIAMOND
ROOFING SYSTEMS
THE CLEAR CHOICE

YOUR STEEP SLOPE SOLUTIONS

PEACE OF MIND

A diamond specialist will work with you to select the right roofing system for your budget and building.

Damaged sheathing is repaired or replaced, the roof deck is cleaned, and a safe working environment is provided during the project to meet tenant, employee, or resident needs and give them peace of mind.

WARRANTY

Our technicians follow strict installation guidelines and use the best roofing system materials.

Warranties vary, depending on selected roofing systems and manufacturers.

INSTALLATION

Before installing the roof system of your choice, we install an underlayment over the roof deck; ensure that flashing for eaves, vent pipes, chimneys, valleys, and skylights are in place; and follow the manufacturer's specific installation instructions.

PREVENTATIVE MAINTENANCE

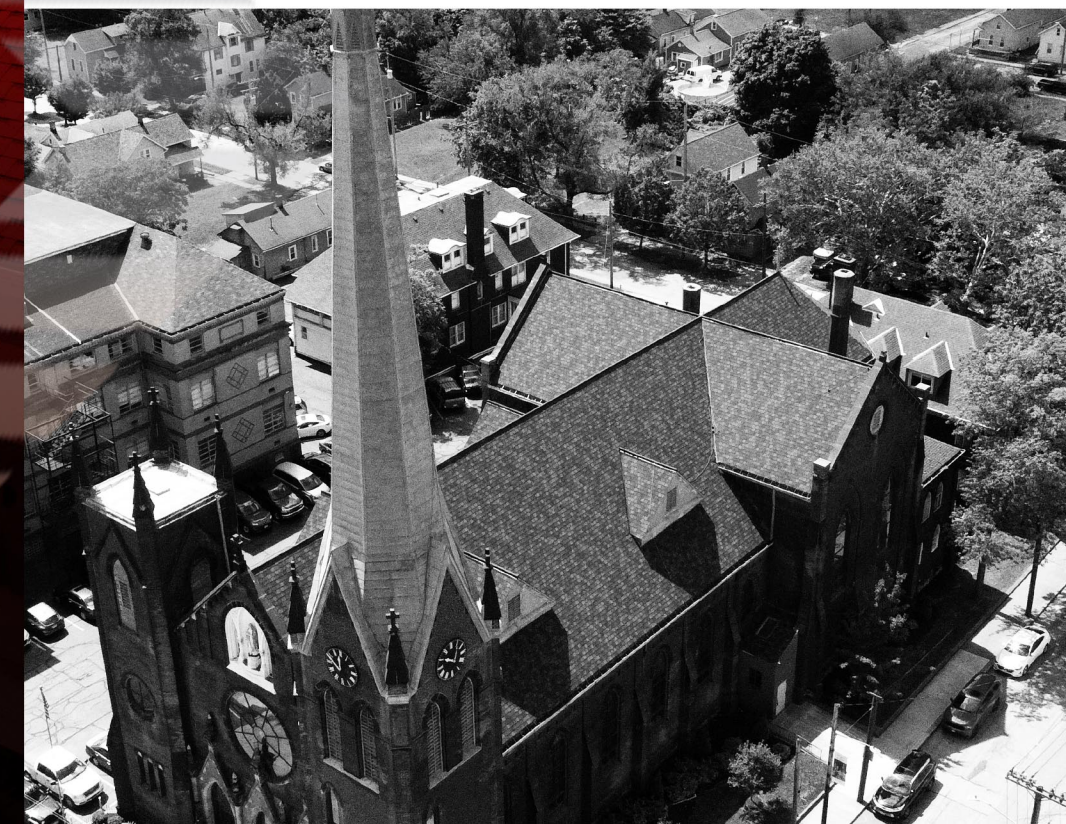

For a long-lasting, quality roof, preventative maintenance is recommended. Different roofing systems require different care.

Diamond Roofing systems has a full-time staff dedicated to inspections and maintenance services.

Our commercial steep slope team has worked on projects of all shapes and sizes in Northeast Ohio and Western Pennsylvania, from new construction projects to historic structures.

With over 60 years of experience under our management team, Diamond Roofing Systems is the best solution for steep slope roofing.

Diamond Roofing Systems has the experience and expertise to install the roofing solution of your choice whether Low Slope (flat) or Steep Slope. If you need asphalt shingles, metal roofing, cedar shake, slate or tile roofing, we have the answer for you.

Steep slope roofing typically refers to roofing materials suitable for roofs of 3:12 or greater.
